

## *Product tips*

### *Mottling-Effect instructions*

#### Requirements:

Paraffin (stearin-free), preferably transparent paraffin (WAX-00102) Mottling-Effect (WAX-00900)

#### Benodigdheden:

For that special cloudy (mottling) effect, add 50 - 100 ml (5-10%) of our Mottling-Effect per 1000 g of paraffin. Melt the paraffin and add the required amount of Mottling-Effect. Stir well and fill the casts. The Mottling-Effect will only work if the paraffin cools slowly. It's therefore important to keep the casts close together and to prevent any kind of draught in the area.

If you are going to colour the candles, remember that certain colours can reduce the effect or even totally eliminate it. Below, we've listed the basic colours that are most suitable. Please contact Gildewerk to find out which trend colours are suitable.

Beige	307
Yellow	309
Maize yellow	383
Orange	322
Cherry red	401
Bordeaux	516
Light pink	342
Dark purple	376
Dark green	625
Black	420
