2. Hazards identification

Page

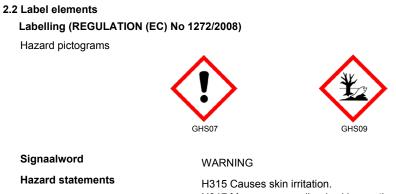

1

2.1 Classification of the substance or mixture

Classification (REGULATION (EC) No 1272/2008)

H315 Causes skin irritation.Skin corrosion/irritation (SCI)Category 2

- H317 May cause an allergic skin reaction. Sensitization, skin (SS)Category 1
- H319 Causes serious eye irritation. Serious eye damage/eye irritation (EDI)Category 2A
- H411 Toxic to aquatic life with long lasting effects. Hazardous to the aquatic environment, chronic toxicity (EH C)Category 2

H317 May cause an allergic skin reaction.

H319 Causes serious eye irritation.

H411 Toxic to aquatic life with long lasting effects.

Page 5 YZS-0801- Hypodor Revisiondate 09-02-2016 Version 2.0 Printdate 09-02-2016 For the full text of the H-Statements mentioned in this Section, see Section 16. 4. First aid measures 4.1 Description of first aid measures General advice Move out of dangerous area. Consult a physician. Show this safety data sheet to the doctor in attendance. Do not leave the victim unattended. If inhaled If unconscious place in recovery position and seek medical advice. If symptoms persist, call a physician. In case of skin contact If on skin, rinse well with water. In the case of contact with eyes, rinse immediately with plenty of water and seek medical advice. In case of eye contact Remove contact lenses. Protect unharmed eye. Keep eye wide open while rinsing. If eye irritation persists, consult a specialist. If swallowed Keep respiratory tract clear. Do NOT induce vomiting. Do not give milk or alcoholic beverages. Never give anything by mouth to an unconscious person. Take victim immediately to hospital. 4.2 Most important symptoms and effects, both acute and delayed Symptoms no data available 4.3 Indication of any immediate medical attention and special treatment needed Treatment no data available 5. Fire-fighting measures 5.1 Extinguishing media Suitable extinguishing media Dry chemical Alcohol-resistant foam Carbon dioxide (CO2) Water sprav Unsuitable extinguishing media High volume water jet 5.2 Special hazards arising from the substance or mixture Specific hazards during firefighting Do not allow run-off from fire fighting to enter drains or water courses. 5.3 Advice for firefighters Special protective equipment for fire-fighters Wear self contained breathing apparatus for fire fighting if necessary. Further information Collect contaminated fire extinguishing water separately. This must not be discharged into drains. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations. 6. Accidental release measures 6.1 Personal precautions, protective equipment and emergency procedures Personal precautions Use personal protective equipment. 6.2 Environmental precautions Environmental precautions Prevent product from entering drains. Prevent further leakage or spillage if safe to do so. If the product contaminates rivers and lakes or drains inform respective authorities. 6.3 Methods and materials for containment and cleaning up Soak up with inert absorbent material (e.g. sand, silica gel, acid binder, universal binder, sawdust). Methods for cleaning up Keep in suitable, closed containers for disposal. 6.4 Reference to other sections not applicable

7.1 Precautions for safe handling			
Advice on safe handling	Avoid exposure - obtain special instructions before use. Avoid contact with skin and eyes.		
	For personal protection see section 8.		
	Smoking, eating and drinking should be prohibited in the applicati	on area.	
	To avoid spills during handling keep bottle on a metal tray.		
	Dispose of rinse water in accordance with local and national regul	lations.	
Advice on protection against	•		
	Normal measures for preventive fire protection.		
Temperature class	no data available		
Fire-fighting class	no data available		
Dust explosion class	no data available		
7.2 Conditions for safe storage, inclu	iding any incompatibilities		
Requirements for storage are			
	Keep container tightly closed in a dry and well-ventilated place.		
	Containers which are opened must be carefully resealed and kep	t upright to preve	ent leakage.
	Electrical installations / working materials must comply with the te	chnological safet	ty standards.
Further information on storage	je conditions		
	no data available		
Advice on common storage	no data available		
German storage class	no data available		
Other data	No decomposition if stored and applied as directed.		
7.3 Specific end uses			
Specific use(s)	no data available		

8. Exposure controls/personal protection

8.2 Exposure controls

Personal protective equipment

Hand protection	Use protective gloves. Gloves must comply with standard EN 374-1/2/3. Suitable material: Nitrile
	Breakthrough time (maximum wearing time): >30 min.
	Thickness of the material: 0.13 mm
Eye protection	Eye wash bottle with pure water
	Tightly fitting, approved safety goggles with side shields with standard EN166.
	Wear face-shield and protective suit for abnormal processing problems.
Skin and body protection	impervious clothing
	Choose body protection according to the amount and concentration of the dangerous substance
	at the work place.
Hygiene measures	When using do not eat or drink.
	When using do not smoke.
	Wash hands before breaks and at the end of workday.

wash)	11		
Odored Distilled Water (that can be added to steam irons)	11		
Cell phone cases	11		

Code YZS-0801-Hypodor

09-02-2016

Note box:

** Category 11 includes all non-skin contact or incidental skin contact products. Due to negligible skin contact the concentration of a fragrance should not exceed the usual concentration of the fragrance compound in the finished product.

For example, hypothetically if the usual concentration of a fragrance compound in the final product, for example a candle, is at 5%, then any individual fragrance ingredient must not exceed 5% in the candle.

For other kinds of application or use at higher concentration levels, a new safety evaluation may be needed; please contact Holland Aromatics BV.

The IFRA Standards regarding use restrictions are based on safety assessments by the Panel of Experts of the RESEARCH INSTITUTE FOR FRAGRANCE MATERIALS (RIFM) and are enforced by the IFRA Scientific Committee.

Evaluation of individual Fragrance ingredients is made according to the safety standards contained in the relevant section of the IFRA Code of Practice.

It is the ultimate responsibility of our customer to ensure the safety of the final product (containing this fragrance) by further testing if need be.
