### \*\*\*IFRA 49th AMENDMENT\*\*\*

On January 10th 2020, IFRA has issued the 49th Amendment to its Standards for the safe use of fragrance ingredients.

As new methodologies (i.e. QRA2 and aggregate exposure model for systemic toxicity) are being introduced as part of the 49th Amendment, leading to new IFRA Standard Categories amongst other changes, IFRA has taken the exceptional decision to grant a prolonged implementation timeline for all Standards within scope of the 49th Amendment:

- For new fragrance compounds, the effective date of the amendment is May 10th, 2021
- For existing fragrance compounds, the effective date of the amendment is May 10th, 2022

Please be informed that the IFRA 48 Standards have been replaced with the IFRA 49th Amendment.

### Note box:

Due to the possible ingestion of small amounts of fragrance ingredients from their use in products in Categories 1 and 6, materials must not only comply with IFRA Standards but must also be recognized as safe as a flavoring ingredient as defined by the IOFI Code of Practice ([www.iofi.org](http://www.iofi.org)). For more details see chapter 1 of the Guidance for the use of IFRA Standards.

- The IFRA Standards are based on safety assessments by the Panel of Experts of the RESEARCH INSTITUTE FOR FRAGRANCE MATERIALS (RIFM) and are enforced by the IFRA Scientific Committee.

The creative perfumery procedures in Gildewerk Fragrances ensure that Fragrance compounds are composed only of ingredients approved by the safety clearance procedure, and satisfy, according to the current state of knowledge, the safety requirements for the intended application under normal and reasonably foreseeable conditions of use.

For other kinds of application or use at higher concentration levels, a new safety evaluation may be needed; please contact Gildewerk.

It is the ultimate responsibility of our customer to ensure the safety of the final product (containing this fragrance) by further testing if need be.
